Issue Nine

INTRODUCTION

Welcome to the 2015 showcase of 'From the Anvil's finest range yet.

Our latest catalogue introduces over 200 new products, designed and developed in response to customer demand for an ever more versatile collection.

The process of hand-forging mild steel to achieve unique pieces of stylish, functional ironmongery is what we do best and we continue to maintain the strength and quality of our brand by honing each item to the highest specification.

Highlights to look out for in this edition include: new hand-forged cabin hooks in two finishes and a wide range of sizes, an octagonal style centre door knob, a variety of new window espagnolette handles, shelf brackets and large pull handles... Amongst them you'll notice that the scope of finishes has been increased to enhance a number of our existing, most popular styles.

THE COLLECTION - ISSUE NINE

PRODUCT FINISHES

BEESWAX

Beeswax Finish - (For Internal Use Only)

The beeswax finish is the most authentic finish for steel. When our highly skilled blacksmiths have finished forging each product the colours left in the steel range from blue to deep red ochre. To preserve these beautiful colours and the texture from the hammer and anvil, we apply pure beeswax. This gives a subtle, matt richness to the metal and offers excellent protection when products are fitted internally and properly maintained. To bring out the best in our original Beeswax Finish we advise that before installation products are given a buff with a soft cloth.

Using maintenance wax will help restore the finish and give protection to this product. Buffing with a cotton cloth will remove the white bloom. If surface rust occurs, rub with 00 grade wire wool and apply Anvil Maintenance Wax with a rag. All moving parts should be oiled prior to fitting and periodically afterwards. See full maintenance guide on page 184.

BLACK

Black Finish - (For Internal or External Use)

Our traditional satin Black Finish is baked in a high-temperature oven giving it an attractive, durable and corrosion-resistant finish which is low maintenance and can be used internally or externally. It is resistant to moisture so can be used in bathrooms and damp conditions.

We recommend that ironmongery is wiped with a lightly oiled cloth from time-to-time. This will remove harmful deposits and restore it to its original condition. All moving parts should be oiled prior to fitting and periodically afterwards. Always use a pilot drill and rub screw with candle wax before fitting. See full maintenance guide on page 184.

PEWTER
PATINA

Pewter Patina Finish * - (For Internal or External Use)

This finish is elegant and beautifully highlights the texture of the steel. Stylish and modern, it is equally suited to a contemporary home as well as a period property.

It has excellent anti-corrosion properties and we recommend that the ironmongery is wiped with a lightly oiled cloth once a month. This will remove harmful deposits and restore it to its original condition. Never use any form of metal cleaner or aerosol spray. All moving parts should be oiled prior to fitting and periodically afterwards.

Screws supplied with this product are finished individually so please take care when fitting. Always use a pilot drill and rub screws with candle wax before fitting. See full maintenance guide on page 184.

* All references to 'Pewter' throughout this brochure refers to products being finished with a 'Pewter Patina Finish'.

BRONZE

Bronze Finish - (For Internal or External Use)

This range is coated with a permanent bronze finish which will always look at its best for years to come and is completely weatherproof. This finish is elegant and beautifully highlights the texture of the steel with rustic and distinctive qualities that complement stained or painted woodwork.

It has excellent anti-corrosion properties and we recommend that the ironmongery is wiped with a lightly oiled cloth once a month. This will remove harmful deposits and restore it to its original condition. Never use any form of metal cleaner or aerosol spray. All moving parts should be oiled prior to fitting and periodically afterwards.

The screws supplied with this product are finished individually so please take care when fitting. Always use a pilot drill and rub screw with candle wax before fitting. See full maintenance guide on page 184.

ANTIQUE
BRASS

Antique Brass Finish - (For Internal or External Use)

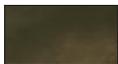

All of our Antique Brass products are cast from high quality solid brass and have been manufactured to the highest standards. This finish has been treated to speed up the natural tarnishing process which produces the antique feel of the product. It is burnished making it smooth in appearance and is used as an alternative finish where a highly polished surface is not desired. The finish is un-lacquered, will tarnish naturally causing the aged patina to darken with time. A semi gloss finish can be achieved by using Brasso. Always use a pilot drill and rub screws with candle wax. See full maintenance guide on page 184.

POLISHED
BRASS

Polished Brass Finish - (For Internal or External Use)

All of our Polished Brass products are manufactured to the highest standards and un-lacquered so to retain the original finish, regular polishing with a good quality metal polish is essential. However, if the intention is to allow the surface to age through oxidization, no attention needs to be given. Over time the brass will acquire a darker and more aged patina. Always use a pilot drill and rub screws with candle wax before fitting. See full maintenance guide on page 184.

IRON

Iron Finish - (For Internal or External Use)

This product is made from Iron & exhibits the natural beauty and texture of the metal. It is cast and dressed giving a tactile finish. It is protected from weather and high moisture areas by a clear powder coating process which also gives it its colour. This finish provides an attractive, durable and corrosion resistant coating which will last for many years if oiled. Always use a pilot drill and rub screws with candle wax before fitting. See full maintenance guide on page 184.

NATURAL SMOOTH

Natural Smooth Finish - (For Internal Use Only)

A natural cast iron, finished with a clear matt lacquer which produces a beautifully textured look and feel. Is only intended for internal use. If fitted externally i.e in an enclosed porch/bathroom it will need to be treated with Maintenance Wax periodically. Always use a pilot drill and rub screws with candle wax before fitting. See full maintenance guide on page 184.

NATURAL TEXTURED

Natural Textured Finish - (For Internal Use Only)

A natural cast iron, finished with a clear matt lacquer which produces a beautifully textured look and feel. These products are only intended for internal use or when used in a protected area like in an enclosed porch, but needs to be waxed periodically. See full maintenance guide on page 184.

ANTIQUPE PEWTER

Antique Pewter Finish - (For Internal or External Use)

This Antique Pewter finish is applied to the product and has excellent anti-corrosion properties. Periodic wiping with a lightly oiled cloth will further help to preserve the beauty of this finish. See full maintenance guide on page 184.

POLISHED CHROME

Polished Chrome Finish - (For Internal or External Use)

A mirror finished, chrome plate applied to either solid brass or steel. See full maintenance guide on page 184.

BRUSHED SATIN CHROME

Brushed Satin Chrome Finish - (For Internal or External Use)

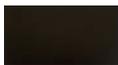

A satin chrome finish which has a brushed effect running down the product. See full maintenance guide on page 184.

POLISHED NICKEL

Polished Nickel Finish - (For Internal or External Use)

A highly polished finish with a nickel plating applied to a solid brass substrate. Nickel is similar to the polished chrome (silver) finish but with a slightly warmer tone. An unlaquered finish because nickel will not tarnish. See full maintenance guide on page 184.

EBONY

Ebony - (For Internal or External Use)

Our Ebony finish products have a rich, dark look and feel for a very distinctive quality. The material has a very high density and fine texture which gives a very smooth finish. Can be polished or waxed to maintain the vibrance of the wood and to give overall protection. Designed to be used internally but can also be used externally if maintained with Anvil wax. See full maintenance guide on page 184.

ROSEWOOD

Rosewood - (For Internal or External Use)

Our Rosewood products are strong and heavy with a richly hued reddish colour and much darker veining. Can be polished or waxed to maintain the vibrancy of the wood and to give overall protection. Designed to be used internally but can also be used externally if maintained with Anvil wax. See full maintenance guide on page 184.

General Care

Lightly oiling as soon as you get or fit your product (not beeswax) will help prevent any build up of harmful deposits which can drastically shorten the lifespan of your furniture. We recommend that ironmongery is also wiped with a lightly oiled cloth from time-to-time (not beeswax). This will help remove harmful deposits and restore it to its original condition. All moving parts should be oiled prior to fitting and periodically afterwards. A 3-in-1 oil would be perfect for all oiling purposes. (See page 184 for more info).

Warning: The chemicals in wet plaster will rust our products. Only fit your new ironmongery when you have made sure that all new plaster is fully cured.

Warning: We do not recommend using our products in coastal areas as the salt content in the air will rust all finishes. Only stainless steel will not rust in this sort of environment and therefore our products cannot be guaranteed.

PENNY END T HINGES

22" T HINGE

OVERALL SIZE: 560MM X 152MM
 FIXING PLATE: 152MM X 38MM

OVERALL DEPTH: 24MM
KEEP SIZE: 118MM X 21MM
OVERALL DEPTH: 24MM

44MM DOOR	● 20711 BZP
57MM DOOR	● 20709 BZP
ANY SIZE DOOR	● 20712 BZP

FRENCH DOOR MULTI POINT LOCK KIT

Kit includes: main lock, slave lock, top or bottom bolts x4, dead lock keeps x4 (26x26mm) and door latch strike plate (144x12mm). Supplied with all necessary screws. All individual items from the kit are shown on our website: www.fromtheanvil.co.uk

Door sizes: Min. 1830mm Max. 2115mm Door size with extension bit 20791 - 2600mm. Suitable for securing flush French timber doors. The master lock securely engages into slave mechanism & automatically deadlocks a slave unit once operated. No need for false (dummy) mullion and a non-handed lock mechanism with reversible sash bolt to minimise stock requirements.

Accepts standard 92mm unsprung handles and euro profile cylinders - See cylinders 20957 (40/40 - key to differ), 20958 (35/45 - key to differ) and 20959 (35/45 - keyed alike).

2 1/4" BACKSET: 57MM	● 20785 SS

CLAW ESPAGNOLETTE GEARBOX

One of the most effective ways of securing PVC, Timber or Aluminium casement windows and are a Police Preferred Specification. The centre claws lock securely into a very substantial centre keep whilst two shootbolts lock into the corners of the window for incredible resistance from attack. This system enjoys BS7590, Secure By Design and BBA approvals for extra peace of mind and gives you the knowledge that all is secure.

BACKSET: 22MM	37980
---------------	-------

BACKSET: 25MM	37981
---------------	-------

ESPAGNOLETTE BARS

Requires two bars to make up the sizes stated below. Extension Rods can be fitted to further extend the Espagnolette Bar length.

300MM-440MM	37987
-------------	-------

370MM-500MM	37988
-------------	-------

490MM-700MM	37989
-------------	-------

690MM-950MM	37990
-------------	-------

950MM-1210MM	37991
--------------	-------

1210MM-1470MM	37992
---------------	-------

EXTENSION ROD

An Extension Rod to be used to increase the Espagnolette Bar length (see above).

37993	180MM-300MM
-------	-------------

CENTRE KEEPS

Standard Centre Keep with an 8mm thickness
Use with left & right handed End Keeps (see below).

Flat Plate Centre Keep with a thickness of 2mm
Use with Shoot Strike End Plates (see below).

37983	THICKNESS: 2MM
-------	----------------

37984	THICKNESS: 5MM
-------	----------------

END KEEPS

An 8mm thick End Keep to be used in conjunction with the Standard Centre Keep (see above). Left and right handed keeps would be needed to complete the system.

LEFT HAND	37985
-----------	-------

RIGHT HAND	37986
------------	-------

SHOOT STRIKE END PLATE

A 2mm thick End Plate to be used in conjunction with the Flat Plate Centre Keep (see above). Two end plates would be needed to complete the system.

37982

WINDOW LOCK

LOCK SIZE: 30MM
 BACKSET: 23MM (25MM WITH FACEPLATE)
 KEEP PLATE SIZE: 90MM X 16MM
 FACEPLATE THICKNESS: 2MM

A small, neat window lock with 7mm spindle drive and stainless steel forends. When morticed into edge of window casement it will take any espag. window fastener. The total answer when window has a draft gasket.

20779  SS

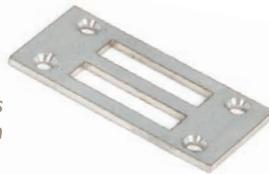

VENTABLE KEEP PLATE

SIZE: 51MM X 24MM

This keep allows a window to be vented and has the added feature of being able to be locked in normal or vented position.

20777  SS

NARROW SPRING UNIT CASSETTE

SIZE: 63MM X 25MM
 THICKNESS: 6MM

Increases performance if your lock is too weak for unsprung handles. Cassette fits flush with the surface of your door and sits behind your handle. See our website for more detailed fitting instructions.

33256/A

SPRING UNIT CASSETTE

SIZE: 51MM X 35MM
 THICKNESS: 13MM

This cassette is designed to increase the tension and performance of an old or weak lock. Cut into the face of the door so the cassette fits flush with the surface and sits behind your door handle. See our website for more detailed fitting instructions.

33256

THREADED TAYLORS SPINDLE

BASE SIZE: 25MM
 SPINDLE: 25MM X 8MM

Can be used to fix threaded knobs (pages 68-69) to doors and drawers i.e. split set for double wardrobe doors.

31298/A $\frac{3}{8}$ BSF THREAD

TAYLORS SPINDLE

BASE SIZE: 25MM
 SPINDLE: 25MM X 8MM

Can be used to fix handles to doors i.e. split set for double wardrobe doors.

31298

THREADED SPINDLE

BASE SIZE: 25MM
 SPINDLE: 20MM X 8MM

Can be used to fix threaded knobs (page 70-71) to doors and drawers i.e. split set for double wardrobe doors.

31298/B M10 THREAD

ELECTRICAL ACCESSORIES

We have brought together a number of decorative electrical accessories that we feel are the closest colour and finish match to our handmade ironmongery. See our guide at the bottom of this page to choose what finish best suits your needs.

10 AMP TWO WAY SWITCHES

FROM THE ANVIL GENERAL MAINTENANCE & CARE GUIDE

General Maintenance

As with any ironmongery on today's market there are general maintenance tips that can be used to keep your products at their best. All of our finishes will last for many years to come but, as with anything, the more you look after it the better it looks!

Our products, especially when used externally, will require the occasional oiling of any moving parts so that they perform to their full capability. Oil prior to fitting and periodically afterwards.

To preserve the integrity of your chosen finish lightly oiling the surface as soon as you get or fit your product (not beeswax - see below for beeswax specific care) is recommended and will help prevent any build up of harmful deposits which can drastically shorten the lifespan. We recommend that ironmongery is also wiped with a lightly oiled cloth from time-to-time (not beeswax). This will help remove any build up on the surface and restore it to its original condition.

A 3-in-1 oil would be perfect for all oiling purposes.

Always use the products we recommend for external or internal use, otherwise you may encounter a degradation of the lacquer/wax finish. Our internal finishes aren't recommended for external use but can still be used, if desired, in an enclosed or protected area, like a porch but you may need to reapply an extra coating of wax (beeswax finish only) or regular oiling on other internal only finishes as you may encounter some surface rusting issues if not totally protected. Pages 4 & 5 of this brochure provide the information on which finishes can be used internally or externally and should be consulted before you make any purchase.

All of our products have excellent anti-corrosion properties if maintained to the specific requirements of each individual finish and will last for many years if given just a little regular care.

The fixings supplied with a number of our products are hand made and therefore a little extra care needs to be taken when fitting. It is recommended that a pilot hole is drilled (especially into hard woods) for all fixings and that you rub the screw with candle wax before fixing. Please take the utmost care when fixing our screws, they are traditional slotted and require a pilot drill along with a well fitted screwdriver, if chipped the head will rust (paint can be applied if needed).

Warnings

The chemicals in wet plaster will rust our products and the moisture in a newly plastered room is phenomenal. Only fit your new ironmongery when you have made sure that all new plaster is fully cured.

We do not recommend using our products in coastal areas as the salt content in the air will rust all finishes. Only stainless steel will not rust in this sort of environment and therefore our products cannot be guaranteed.

Do not use any form of chemical cleaner (e.g. oxalic acid) or aerosol spray as this can break down any finish or lacquer on the surface of your product. When applying wood finish cover the ironmongery or better still remove. Wood stain may seem harmless but a few drops on un-lacquered brass will do damage.

Beeswax Finish

The beeswax finish is the most authentic finish for steel and to preserve the colours and the texture from the forge, hammer and anvil, we apply pure beeswax. This gives a subtle, matt richness to the metal and offers excellent protection when products are fitted internally and properly maintained. When choosing the Beeswax finish, sometimes because of temperature changes and packaging conditions, your product might have signs of a slight white bloom on opening. We recommend you buff it with a soft cloth, this will restore the finish to its intended glory.

223/14 - 3-in-1 Oil

However, mild steel or malleable iron, which are the two materials we forge, when fitted in damp bathrooms or wet properties, have the potential to exhibit surface rust. If surface rust does occur rub with 00 grade wire wool and apply maintenance wax with a rag or brush. The maintenance wax will restore the finish and afford protection.

As with all our products all moving parts should be oiled prior to fitting and periodically afterwards so using 3-in-1 oil will be ideal for this purpose. Please note that any oil can break down the wax finish so care must be taken when applying to any Beeswaxed finish product.

33002 - Anvil Maintenance Wax

Brass Finishes

All of our brass products are cast from high quality solid brass and have been manufactured to the highest standards. They are un-lacquered and will therefore naturally age through oxidization. The Antique Brass finish has been treated to speed up this natural tarnishing and ageing process which produces the antique feel of the product. It is burnished making it smooth in appearance and is used as an alternative finish where a highly polished surface is not desired. To maintain this ageing process no care needs to be taken other than the occasional oiling of working parts. However, if you require a semi gloss finish, this can be achieved by applying a coating of good quality metal polish and following the manufacturer's directions.

Polished Brass items will need to be maintained at regular intervals if you would like to keep the original quality and finish, especially if being used externally or in high moisture areas (bathrooms etc). A monthly polish will suffice in these situations and will be enough to maintain the quality finish. Alternatively, the brass can be left to age of it's own account through oxidization and will gain a darkened patina through the years.

Wooden Finishes

We use high quality wood products in the From The Anvil range and they can be kept to these high standards by way of a simple maintenance routine. These products can be polished or waxed which will maintain the vibrancy of the wood and give overall protection. They have been designed to be used internally but can also be used externally if regularly maintained with our Anvil wax.

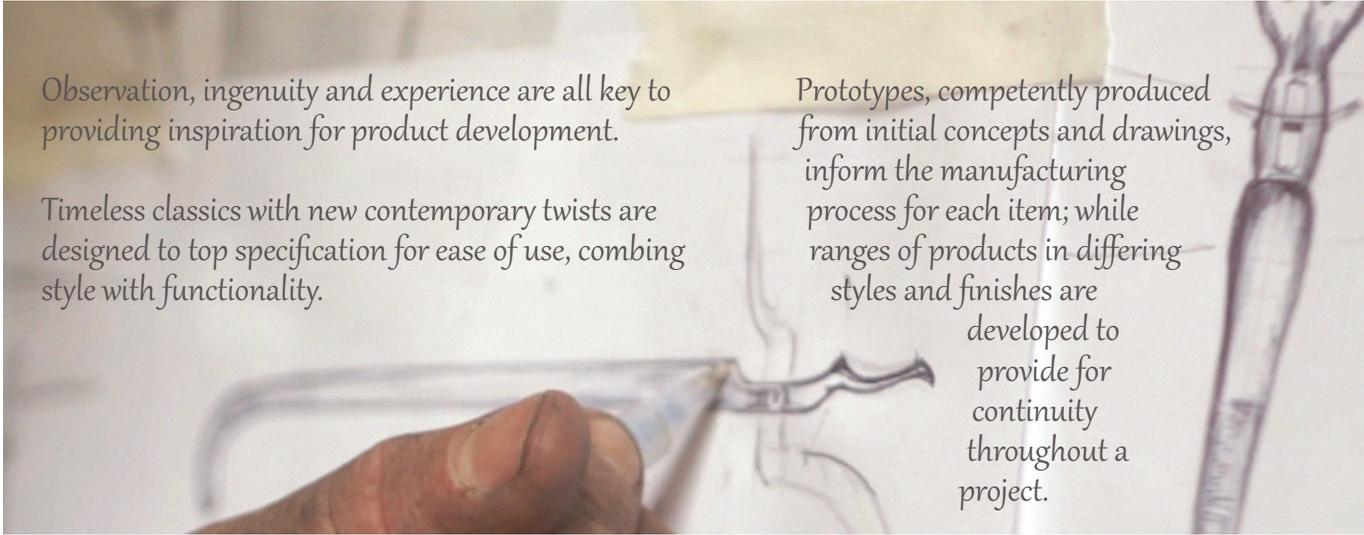

Advice

We supply our quality products through a network of official registered stockists spread far and wide from one end of the country to the other and also covering the Rep. of Ireland. So if you need any advice or have any questions regarding any of our products, finishes or care guides please feel free to get in touch with the stockist you originally bought from or with us as we are always keen to get feedback on our ironmongery. Alternatively our website has a wealth of information regarding all the issues you may have, in our F.A.Q. pages, how to guides and detailed photos of every product we make.

For any information visit us at:

FROM THE ANVIL DESIGN - MANUFACTURE - QUALITY

Observation, ingenuity and experience are all key to providing inspiration for product development.

Timeless classics with new contemporary twists are designed to top specification for ease of use, combining style with functionality.

Prototypes, competently produced from initial concepts and drawings, inform the manufacturing process for each item; while ranges of products in differing styles and finishes are developed to provide for continuity throughout a project.

Traditional methods of shaping the base metal, using fire and an Anvil, ensure that we retain both strength and beauty in the resulting products.

Within the 'Anvil's' hand-forged range no two pieces are identical. Each item is a unique yet functional work of art skilfully created by one of our master craftsmen.

16 years experience and a wealth of ingenuity has established 'From the Anvil' as an accomplished manufacturer of quality ironwork.

The manufacturing process of hand forging mild steel enables 'From The Anvil' to achieve the strongest and most unique ironmongery available on the market with a focus on quality as products are honed to the highest specification.

CUSTOMER HOMES

From The Anvil products in use in your home...

Does 'From the Anvil' hand forged ironmongery already add that beautiful finishing touch to an aspect of your home?

Are you so proud of your property that you'd want to show it off to the world?

Would you be happy for your project to feature as a case study on our website or in future issues of our glossy brochure?

If the answer is yes, then we'd really like to hear from you!

Drop an email to us at: casestudies@fromtheanvil.co.uk attaching an image or two detailing our ironmongery in your home, new build or renovation project.

We may just spotlight your home as part of our 'Customer Homes' feature on our new website at: www.fromtheanvil.co.uk/case-studies and, if we do, we'll give you £200 (r.r.p.) worth of 'From the Anvil' products of your choice.

SUPPLY POLICY

It is our policy to distribute our products through a strong network of trade outlets namely architectural ironmongers and builders' merchants throughout the UK.

Please e-mail: info@fromtheanvil.co.uk for a recommended outlet in your area.

CONDITIONS OF SALE

1. Slight variations in sizes and colour may occur due to the hand-crafted nature of the products. This is why people buy our products because no two items are the same.
2. All items shown within this catalogue are offered subject to availability.
3. Any prices or quotations obtained verbally will not be deemed valid, nor will any responsibility or intent be accepted.
4. Deliveries direct to site will not be undertaken without full postcode, contact name and telephone number. Please note that 'From the Anvil' does not accept any liability for site deliveries and they are sent at the customers' own risk.
5. Whilst 'From the Anvil' endeavours to offer outstanding service, our prompt progression of orders means that they maybe unable to include additions with the main consignment once it has been processed and packed. Hence these may be considered as a separate order and be subject to additional carriage charges.
6. All requests for returns must be made in writing. The customer will be charged a restocking charge and the goods are to be returned at the customers' own expense. The goods must be in a re-saleable condition and must be authorised by us. If packing is not complete no credit will be given. The customer must provide us with the original invoice, despatch note or other proof of purchase. All goods will be thoroughly inspected before credit is given.
7. Claims for shortages, damaged goods or incorrect supply must be notified within 3 days of receipt. No responsibility will be accepted after this interval as the goods will be deemed examined and satisfactory.
8. To the best of our knowledge, all definitions, descriptions and photographs contained in this catalogue are correct at the time of going to press. We cannot, however, be held legally liable for any inaccuracies of definition or description.

Please note that any information within this catalogue is to be used as a recommendation of use only, and 'From the Anvil' does not accept any liability. 'From the Anvil' Customers are encouraged to seek other technical advice. Due to the printing process we advise that you do not use the colour images in this catalogue as an indication for colour replication.

9. In the event of goods proving faulty by way of manufacture, 'From the Anvil' will replace the same but in doing so, no liability, consequential or otherwise, is accepted.
10. 'From the Anvil' warrants that the goods are of merchantable quality (as defined in the Sale of Goods Act 1979) but does not warrant that the goods are fit for any specific purpose and accepts no liability for any loss or damage suffered by the customer as a result of any defect in the design, materials or workmanship of the goods.
11. The customer shall indemnify 'From the Anvil' in respect of any loss, injury, expense or claim of whatsoever nature and howsoever arising out of the Contract or the goods, or their storage, installation, use, operation or maintenance save to the extent that the same is caused by negligence of 'From the Anvil', its servants or agents, including 'From the Anvil's subcontractors.

N.B.  is a registered Trademark and may, in no way be reproduced, replicated or copied without prior consent or agreement from the management.

Wherever possible our products have been stamped with an Anvil Authentication Mark to show genuine 'From The Anvil' products.

Owning a period property can be very rewarding but restoration and repair can often be a daunting challenge.

Maintaining the feel of authenticity you originally fell in love with by using modern, mass-produced fixtures and fittings is almost impossible.

All 'From The Anvil' items are hand-forged by master craftsmen using traditional English blacksmithing methods.

Designs are based on timeless classics, but hand-forging means that no two pieces are identical, each one a unique yet functional work of art that will only enhance it's setting.

We hope you enjoy our new 'From The Anvil' ironmongery collection.
